Our story so far

Dacon AS has since 1979 been developing and producing maritime rescue equipment to facilitate in various man overboard rescue situations. Some of these have become industry standards and most products have been supplied all over the world.

Throughout the years, we have continued to design the very best rescue products, and our focus has always been on man overboard recovery systems. Today Dacon`s hallmark is the high- quality equipment with its unique function standards. This is what our customers have come to expect of us, and what we take pride in.

Based on our experience from the industry, our man overboard rescue systems have been designed to handle even the most challenging conditions. All our rescue equipment is manufactured in Norway, and made to fit just about any craft on the water.

DACON RESCUE FRAME

Man Overboard Recovery System for FRCs and Life Boats

Special Features

- Horizontal recovery
- Intuitive use
- Compact dimensions
- 40+ years track record

Typical Applications

- MOB Boats
- SAR Boats
- Fast Rescue Crafts
- Military RHIBS
- Life Boats
- Cruise Tenders
- Tug and Workboats

Words from the industry:

"The reason we chose this system was that we could get a **tailor-made solution** to our specification and needs.

We also got a chance to **take part** in the project, and we feel that our thoughts and experiences were implemented."

- Captain Knut Even Rislaa, on 17 m SAR vessel "RS Inge Steensland"

DACON RESCUE SCOOP

Power- assisted method of recovery

Special Features

- Excels in severe weather conditions
- Crew stays safely onboard during operation
- Perfect for short-handed crew
- Optional use as a scrambling net
- 900+ units supplied worldwide

Typical Applications

- ERRV / Standby / SAR Cutters
- Navy ships
- Crew transfer / Small ferries
- Offshore wind / Offshore support
- Tug & workboats
- Seismic support

Words from the industry:

"The Dacon Scoop is a **breakthrough** in the way of rescuing a person from the sea."

- Captain Manbjørn Martinsson, Seismic Support vessel

"I am **fully satisfied** with the Dacon system. From MOB alarm sounds, we can pick someone up safely within 3-4 minutes."

- Captain Billy, on 24m. SWATH offshore wind vessel

DACON RESCUE BASKET

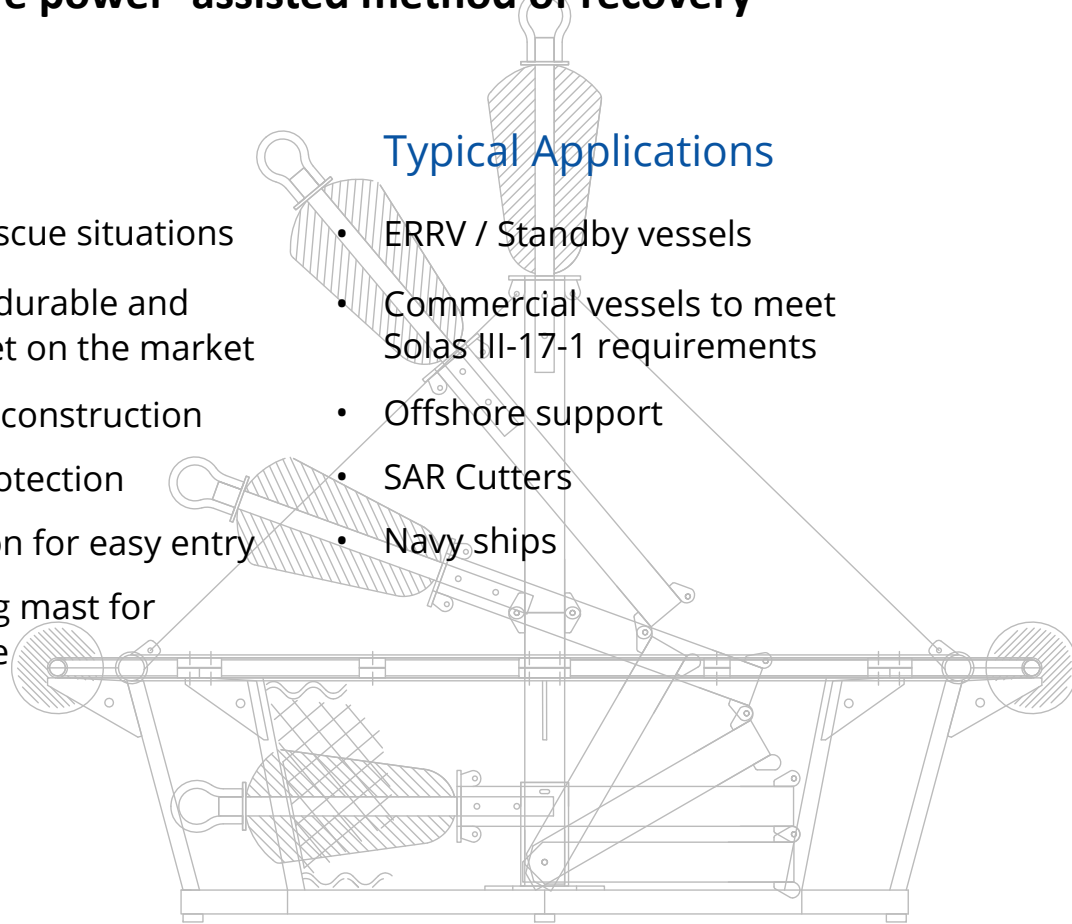

Stable and effective power- assisted method of recovery

Special Features

- Perfect for mass rescue situations
- Probably the most durable and stable rescue basket on the market
- Rugged aluminium construction
- Soft padding for protection
- Low floating position for easy entry
- Quick- folding lifting mast for convenient stowage

Typical Applications

- ERRV / Standby vessels
- Commercial vessels to meet Solas III-17-1 requirements
- Offshore support
- SAR Cutters
- Navy ships

DACON SCRAMBLING NET

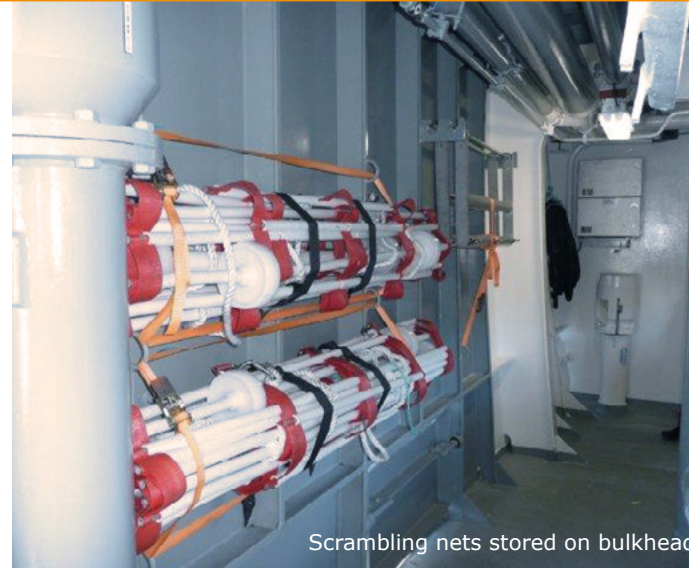

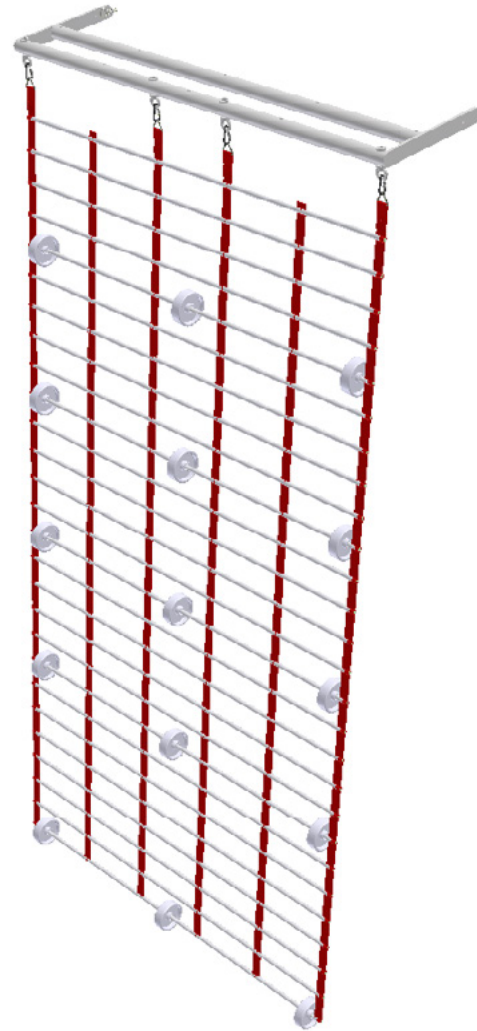

Rigid type, stable and easy to climb

Special Features

- Easy to climb
- Rigid type
- Very low total lifecycle cost
- Optional fold-over installation frame
- Alternative all-black version for military use

Typical Applications

- ERRV / Standby Vessels
- Navy Ships
- Offshore Support
- SAR Cutters
- Offshore Wind Vessels

Scrambling nets stored on bulkhead

DACON RESCUE DUMMY

A training dummy that enables the most real life rescue scenarios

Special Features

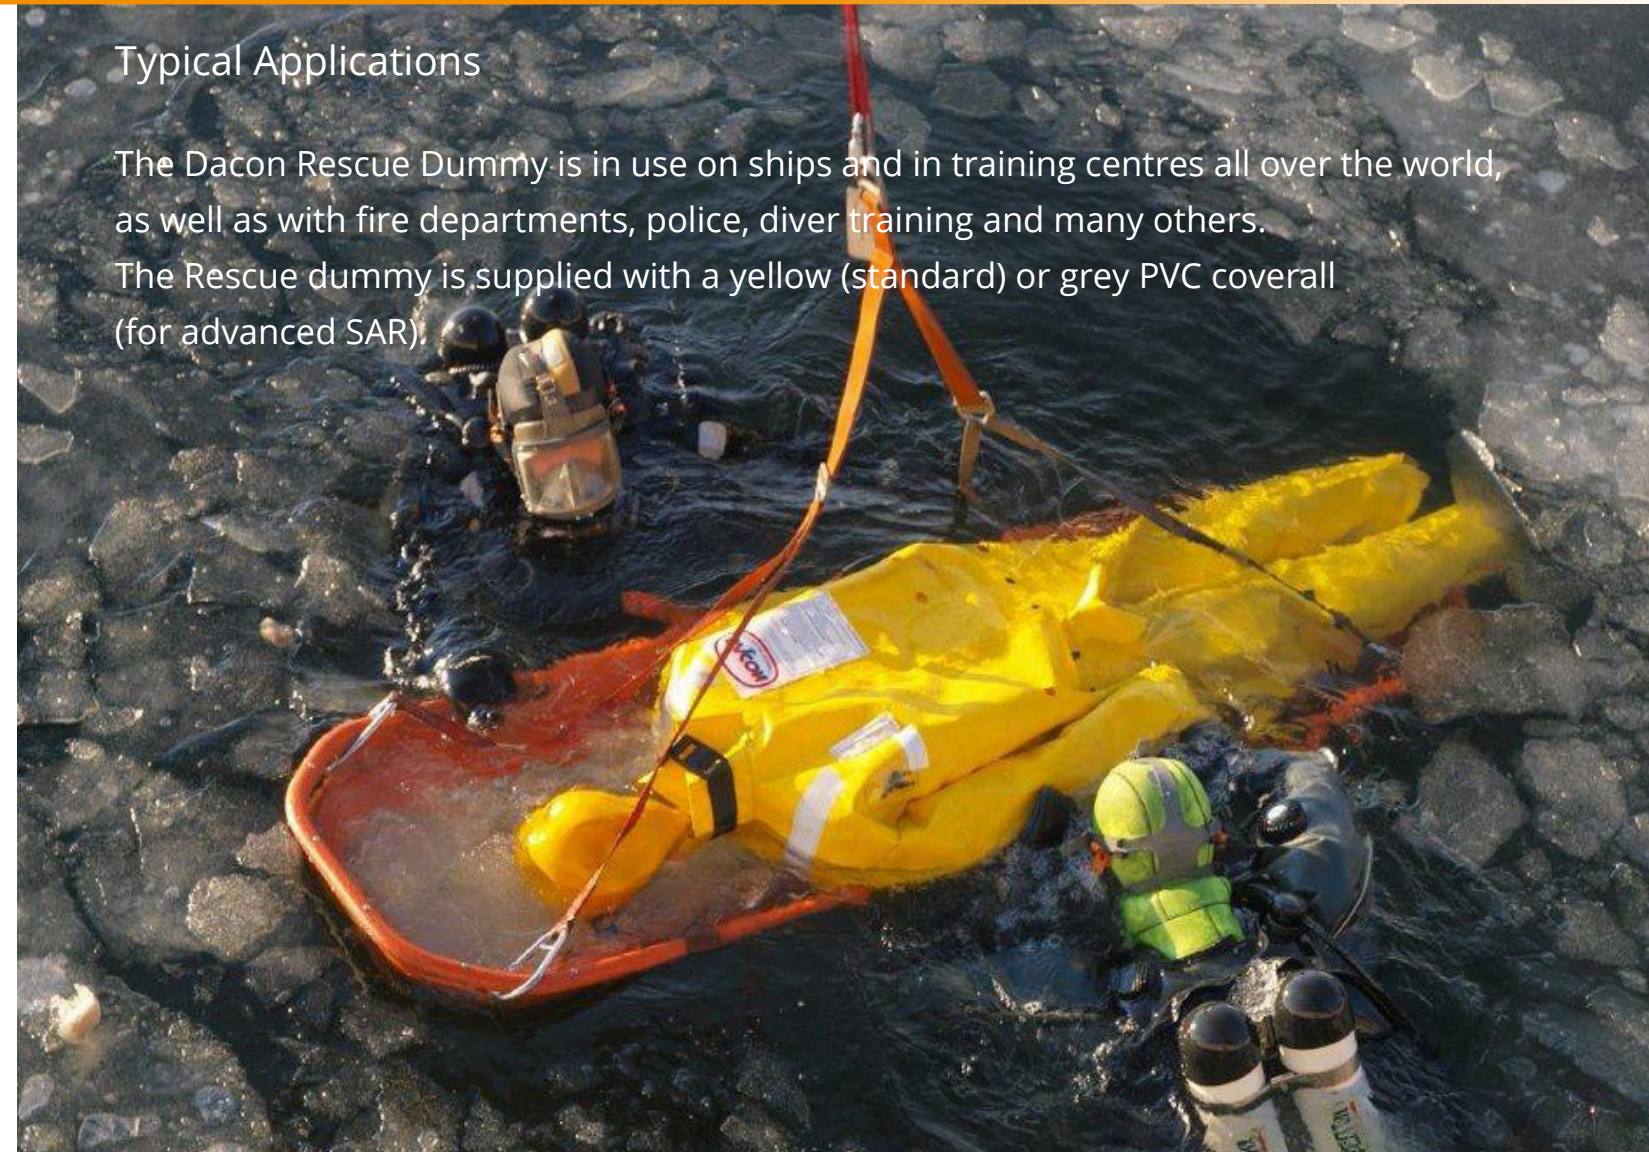

- Realistic height and weight
- Realistic joints
- Extremely rugged
- Adjustable floating position (horizontally vs. vertically)
- Available with a negative buoyancy for underwater SAR training
- Drainable for convenient storage and transport

Typical Applications

The Dacon Rescue Dummy is in use on ships and in training centres all over the world, as well as with fire departments, police, diver training and many others.

The Rescue dummy is supplied with a yellow (standard) or grey PVC coverall (for advanced SAR).

RESCUESTAR

Versatile rescue system for vessels with limited deck/storage space

Special Features

- Handled from the vessel, no exposure to crew
- Automatic adaptation to wave height
- Robust steel framework
- Folding ability upon storage
- Low maintenance

The perfect fit

The RescueStar is the perfect alternative to the Dacon rescue Basket, for all vessels that have limited deck space.

The RescueStar is as brilliant as it is simple. Its foldable design requires little storage space, and it deploys easily and quickly.

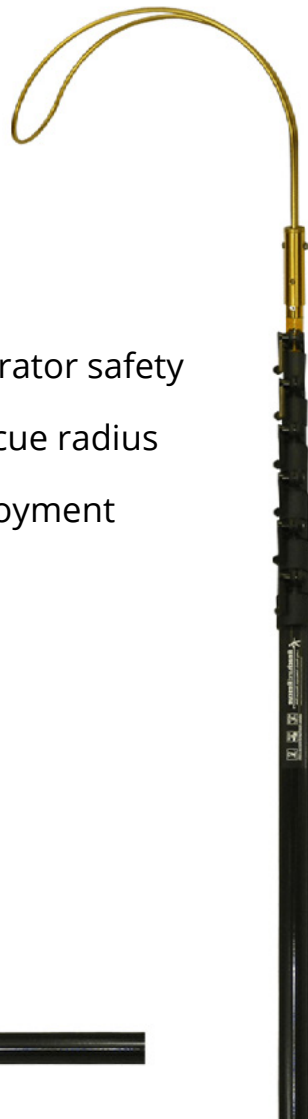

REACH AND RESCUE POLE

High tech long reach pole system

Special Features

- Fast retrieval of victim
- Varied selection of tools and location devices
- Super versatile for many different rescue applications
- Improved operator safety
- Up to 60ft rescue radius
- Accurate deployment
