

Jo**Bird**®

BUILT BY

THE BEST

TO WITHSTAND

THE WORST.

Stay safe, secure and protected with Jo Bird onshore and offshore storage solutions

If your business is onshore or offshore, chances are that you're operating in a harsh and often hostile environment where equipment security and protection are key to the safe, secure running of your enterprise and the well-being of your people. So make sure you choose Jo Bird specialist storage solutions. Our products deliver the very best in quality, durability and versatility – and provide decades of hard-working maintenance-free service. So when there's a crisis, be sure that the equipment you need is protected, in perfect condition, and immediately accessible – thanks to Jo Bird cabinets.

The widest choice on the market

Offering the widest choice of products available in the specialist heavy-duty storage solutions sector, Jo Bird designs and manufactures cabinets principally for the safe

keeping of lifesaving, fire safety, first aid and safety equipment. Jo Bird products provide the highest standards of protection against water and other potentially damaging forms of ingress - in fact the majority of Jo Bird cabinets are IP56 Lloyds Type-tested and ABS approved, standards which are not matched by our competitors.

Custom or standard products

Our products can be tailor-made individually to your precise needs - or you can choose from a range of our standard cabinets to suit your purposes. Both types of product offer outstanding resilience and toughness, as well as being long-lasting and capable of withstanding the harshest treatment, from intensely hot desert environments to sub-zero arctic conditions.

Trusted by top companies in major sectors

Jo Bird products are used extensively in offshore/onshore oil, petrochemical, gas and wind generation sectors, for deep-sea and coastal shipping, as well as on inland waterways, in waterfront locations and at marinas. Our client companies include Tui, Equinor, Aida, Fred Olsen, Möller-Maersk, Seatruck, Svitzer Marine, Van Oord, Boskalis, Damen, DEME, P&O, Royal Caribbean and Carnival Cruises. Jo Bird storage cabinets can also be found in schools and hospitals, industrial and factory locations, public buildings, airports and railway stations.

Years of experience – international approvals

Founded in 1986 and based in Highbridge, Somerset, UK, Jo Bird has been growing its product range, industry expertise and reputation for over thirty years. Our workplace has an impressive safety record and we have been awarded Lloyd's Register Type-test approval for most of our lifesaving and fire safety storage solutions. We have also received American Bureau of Shipping (ABS) approval.

Impressive certifications

Our products are Quality Assured under BS EN ISO 9001 and 14001. These provide further independent endorsement of the quality of our products - and in 2018, we were proud winners of the Queen's Award for Enterprise: Innovation.

State-of-the-art design

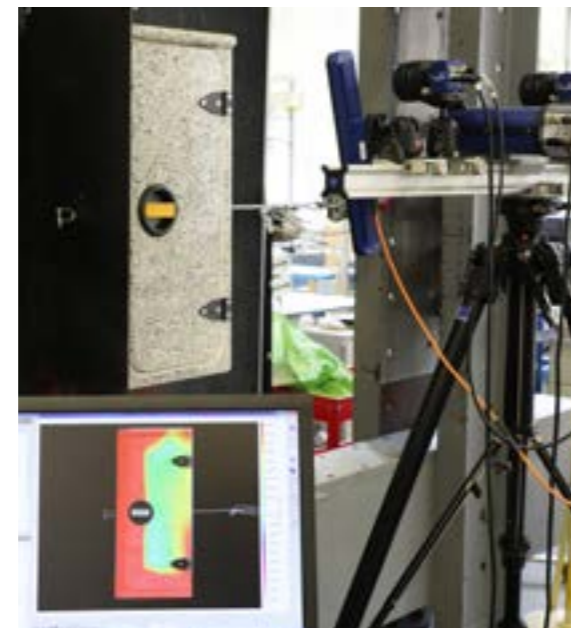

All our products are developed using a combination of our designers' ingenuity, experience and expertise, allied to the use of advanced Computer-Aided Design (CAD) techniques. Our design solutions factor in the need for exceptional rigidity, durability and resistance to external extremities of temperature and weather. Furthermore, closing, sealing and locking systems are designed to resist dust and water ingress under even the most extreme conditions. Aesthetic design considerations ensure that Jo Bird products look good in any environment – from harsh industrial locations and busy public shopping centres to luxury cruise ships.

Rigorous testing

As well as being thoroughly tested under long-term exposure conditions, our products are rigorously tested by TÜV SÜD Product Service, an independent product testing company that ensures our storage cabinets demonstrate the highest standards of safety, reliability and compliance. In addition, we have enlisted the help of Bristol University in further rigorous product testing. Tests involve exposing Jo Bird cabinets to cyclone-speed winds and extremes of high and low temperature (as cold as -50°C), as well as tests against water ingress at low and high pressure.

"We performed a test on Jo Bird product number SOS506 at -60°C. All went well with no deformation or cracks. Attempts to smash the box with a hammer failed. PE material was still plastic enough to reform subsequent to sudden deformation."

A testimonial from Grzegorz Pzeradzki (Product Manager - Fire, Foam and Detection)

Comprehensive research and development

We have made major investments in R&D at our Somerset headquarters, and we are constantly testing and enhancing the materials we use, so as to improve their resilience, stress-resistance and durability. We pay special attention to the design, manufacture and toughness of hinges, seals, closing and fixing mechanisms, to ensure that they are able to withstand even the toughest all-weather conditions over a period of many years.

A choice of product types

Our portfolio of storage solutions is divided into two broad product types:

JB Range - 5 years guarantee

If you have specific criteria for the kind of cabinets you require, we have a huge range of standard cabinet moulds from which we can make products tailored to suit the equipment being stored inside.

Features include:

- tailor-made interior configuration and layout
- individual hand-laminated material construction according to usage requirements
- choice of cabinet colours and lettering
- fitting of ventilation, insulation and heating options
- resistance to wind, water, pressure, shock and other factors

Alternatively we can make bespoke moulds to exact required dimensions and our product design team will issue you with cabinet layout drawings before work is commenced.

SOS Range - minimum of 3 years guarantee

We have a wide range of off-the-shelf cabinets and chests in our warehouse for immediate despatch. These products are manufactured from specially formulated materials that have excellent tolerance to high and low temperatures plus high resistance to impacts, so are ideally suited to marine environments.

Exacting standards of manufacture

Manufactured in the UK Somerset factory, where we use advanced manufacturing techniques and the very best materials and construction methods. All our products are available in highly UV-resistant internationally recognised colours, and cabinets in special colours can be made to order. Product features include robust, easy-access door openings and handles, plus high-performance corrosion-resistant door hinges, which are secured with 316 stainless steel nuts and bolts rather than rivets, which are favoured by most of our competitors. Anti-tamper seals can also be included, along with perspex windows for ease of contents identification. Mounting features can allow for left-handed or right-handed opening.

Carbon Net Zero Pledge

Jo Bird have recently signed up to the Carbon Net Zero pledge to halve our CO₂ emissions by 2030.

Our production processes are also being altered to reduce waste and airborne pollution through the increasing use of closed moulds. We are also using more materials derived from recycled plastics to help us reach our pledge.

Cabinet uses

Our cabinets offer a wide range of uses across the following applications:

- Fire – fire extinguishers; hoses; firefighters' clothes and equipment
- Maritime – lifejackets; lifebuoys; immersion/survival suits
- First aid and emergency – first aid/medical kits; stretchers; personal evacuation; breathing apparatus; smoke hoods; torches; gloves

Detailed product information

Our product range demonstrates the variety of specialist storage solutions we can offer, all designed and built to deliver maximum maintenance-free service for many 20+ years.

When you work in an environment where a fire hazard could be deadly, make sure your equipment is protected with Jo Bird cabinets.

Fire hazard storage and safety

Fire extinguishers; hoses; firefighters' clothes and equipment

Awarded a number of exacting third-party certifications, these cabinets provide a sanctuary for fire safety equipment, offering robust, long-lasting maintenance-free protection against the harshest of offshore and onshore environments. Cabinets will withstand temperatures of -55C to +60C, as well as extreme water, ice, sand, dust and wind conditions. Nearly all the fire equipment range can be insulated and heated for outdoor use in colder climates.

We offer a range of composite construction ready-made fire products;

Fire extinguisher cabinets to store portable fire extinguishers (single or multiple), wheeled fire extinguishers and foam trolleys.

Single and multiple lay flat fire hose options as well as fire hose reel assemblies with special brackets provided for nozzles and other equipment.

Fire fighter's equipment for single complete sets including SCBA to cabinets holding up to five lots of equipment including spare bottles.

Fire extinguisher cabinets

JB82

- To store 1 x 6-12 litre/kg fire extinguisher up to 700mm high
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire extinguisher cabinets

JB84

- To store 1 x 5kg CO₂ fire extinguisher up to 939mm tall
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire extinguisher cabinets

JB83

- To store 2 x portable fire extinguishers including most 5KG CO₂
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire extinguisher cabinets

JB87

- To store 2-3 x portable fire extinguishers including most 5KG CO₂
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire hose equipment cabinets

JB80

- To store 1 x 15-20m fire hose and nozzle
- Lloyds/ABS approved composite construction with UV inhibitors
- IP65
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire hose equipment cabinets

JB85.360H

- To store 2 x 23m fire hoses and nozzles
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel hose pin to support hoses.
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire hose equipment cabinets

JB87H

- To store 2 x 303m fire hoses and nozzles
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel hose pin to support hoses.
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Fire hose equipment cabinets

JB10H

- To store 4 x 30M fire hoses and 2 x nozzles
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod handle for fast access
- 2 x 316 stainless steel hose pins
- 1 x 316 stainless steel double nozzle bracket
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Firefighters' equipment cabinets

JB08FE

- To store 2 set of fire fighter's equipment including SCBA with uniform folded
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod handle for fast access
- 1 x shelf and 2 x BA clips
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Firefighters' equipment cabinets

RS250FE

- To store 2 sets of fire fighter's equipment including SCBA with uniforms folded
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Roller shutter door
- Includes shelf and BA clips
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Firefighters' equipment cabinets

JB17FE

- To store 2 sets of fire fighter's equipment including SCBA with uniforms hanging
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Double door with 316 stainless steel 3 way locking
- Includes shelves, hanger and BA clips
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Firefighters' equipment cabinets

RS300.600FE

- To store 4 sets of fire fighter's equipment including SCBA with uniforms hanging
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Roller shutter door
- Includes shelves, hanger and BA clips plus spare bottle straps
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifesaving cabinets

When keeping safe near water is a priority, make sure your equipment is protected with Jo Bird cabinets.

Marine hazard storage and safety

Lifejackets; lifebuoys; immersion suits

Giving you the assurance of ultimate protection against hostile marine environments, our maritime equipment chests and cabinets are produced from robust composites, comprising premium-quality Lloyds-approved gelcoats, resins and glass for durability and longevity. The gelcoats have UV inhibitors to minimise fading.

All our cabinets can be used to store a mixture of equipment too, such as smoke hoods and decent devices in addition to lifejackets and immersion suits.

Our lifejacket immersion suit chests are available in a range of sizes, or we can produce a bespoke product. Our life vest cabinets contain built-in inflatable lifejacket hangers, or they can be fitted with shelves. Our off-the-shelf models are available in a variety of sizes - or we can produce a model to suit.

As well as producing ultra-high-resistance Lloyds-approved products for onshore and offshore environments, we also manufacture a range of ready-made lifebuoy housings suitable for marina and inland waterway environments. These are tough and durable for many years of reliable service.

Lifesaving cabinets

Lifejacket/immersion suit chests

SOS510

- To store up to 20 x foam filled lifejackets or a smaller number of immersion suits
- UV stabilised rota moulded polyethylene construction
- IPX5
- Marine bungy cord closure for fast access in an emergency
- Can be stacked up to 8 high to reduce transport and storage costs
- Lettering optional

Other products available within the range.

Lifejacket/immersion suit chests

JB71

- To store up to 18 x foam filled lifejackets or a smaller number of immersion suits
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel lid catches and hinges
- EPDM lid seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifejacket/immersion suit chests

JB72

- To store up to 35 x foam filled lifejackets or a smaller number of immersion suits
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel lid catches and hinges
- EPDM lid seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifejacket/immersion suit chests

JB75

- To store up to 83 x foam filled lifejackets or a smaller number of immersion suits
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel lid catches and hinges
- EPDM lid seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifjacket/immersion suit cabinets

JB14LJ

- To store 8-10 automatic lifejackets on hangers
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod door handle for fast access
- 2 x automatic lifejacket hangers
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifjacket cabinets

JB08LJ

- To store up to 20 automatic lifejackets on hangers
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod door handle for fast access
- Fitted with 4 x automatic lifejacket hangers
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifjacket cabinets

JB17LJ

- To store 40-45 automatic lifejackets on hangers
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Double door with 316 stainless steel 3 way locking
- Fitted with 9 x automatic lifejacket hangers
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifjacket cabinets

JB17.1200

- To store up to 120 x foam filled lifejackets or a smaller number of immersion suits
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Fitted with 1 x central shelf
- Double doors with 316 stainless steel 3 way locking
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Lifebuoy cabinet

JB15

- To store 1 x 762mm lifebuoy and line
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod handle for fast access
- 316 stainless steel over centre catch
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

30" lifebuoy cabinet

SOS4

- Open fronted housing to protect a 762mm lifebuoy and throwing line
- Lifebuoy fits onto hooks inside for easy removal in an emergency
- Manufactured from tough UV inhibited orange polyethylene
- Can be wall, railing or post mounted with two galvanised post options
- Optional front cover secured with marine bungy cord for enhanced weather protection

22" lifebuoy cabinet

SOS700

- Fully enclosed lifebuoy housing to protect a 560-610mm diameter lifebuoy
- Designed with assistance from the RNLI
- Manufactured in tough UV stabilized orange polyethylene with inmould graphics
- Double doors with single handle for great weather protection and fast access
- Security seal facility on front to deter the curious
- Can be wall, railing or post mounted with options of two GRP posts or one galvanised post
- Optional sign board with mounting brackets when used with two GRP posts

Rescue line cabinet

SOS603

- Fully enclosed rescue line cabinet with drop down door
- Can store any of the popular throwing bags on the market
- Manufactured in tough UV stabilized orange polyethylene with 316 stainless steel fittings
- Security seal or padlock facility on front to deter the curious
- Can be wall, railing or post mounted to suit almost any waterside location
- Shown with one of the two post mounted options

In cases of medical emergencies trust your lifesaving equipment is protected with Jo Bird cabinets.

First aid, breathing apparatus and emergency storage

First aid/medical kits; stretchers; personal evacuation; breathing apparatus; smoke hoods; torches; gloves

Medical emergencies happen and when they do you need the peace of mind which comes from knowing that your equipment is protected.

Our emergency equipment cabinets are manufactured from hardwearing composite. They are Lloyd's Type Test-approved, and carry an IP56 rating. Our breathing apparatus storage range includes off-the-shelf cabinets for single escape sets, plus one or two full-duration breathing apparatus sets. Fire retardancy, a shelf, a window, or 6mm-thick wall thickness can be added on request, and other customised solutions can be provided to order.

Our first aid and stretcher cabinets are Lloyd's Type Test-approved, and carry an IP56 rating. Stretcher cabinets house Paraguard, Duofold, Neil Robinson and basket-type stretchers.

Escape set cabinets

SOS100

- To store 1 x 10-15 minute emergency escape breathing apparatus (EEBD)
- High quality and very tough polycarbonate lid with ABS back
- Left or right hinged door with EPDM seal
- Handle can be fitted with anti-tamper seal
- Tested to IP54
- Designed for bulkhead mounting on ships

Other products available within the range.

Breathing apparatus cabinets

JB83BA

- To store 1 x 30-60 minute self contained breathing apparatus (SCBA)
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary handle for fast access
- Handle can be fitted with anti-tamper seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Breathing apparatus cabinets

JB87BA

- To store 1 x 30-60 minute self contained breathing apparatus (SCBA) and 1 x spare cylinder
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon/316 stainless steel rotary door handle with anti-tamper seal and Biomaster® anti-microbial technology
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Breathing apparatus cabinets

JB54BA

- To store 2 x 30-60 minute self contained breathing apparatus (SCBA) and 2 x spare bottles
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod handle for fast access
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

First Aid and AED cabinets

JB04AED

- To store 1 x AED
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Polyamide handle for fast access
- 1 x perspex window
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Stretcher cabinets

JB14

- To store 1 x folding (Paraguard type) stretcher
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- Nylon rod handle for fast access
- EPDM door seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Stretcher cabinets

JB38

- To store 1 x basket stretcher
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel 3 way locking for fast access
- EPDM door seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Stretcher and first aid cabinet

JB38.700SS

- To store 1 x basket stretcher and first aid equipment
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel 3 way locking for fast access
- EPDM door seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Helicopter rescue cabinets

JB22HELICRASH

- For the storage of CAP 437 helicopter rescue equipment
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel hinges and over centre catches
- EPDM lid seal
- Fitted with 316 stainless steel hooks and brackets to hold tools
- Can be tailored to suit with other colours and lettering options

Other products available within the range.

Emergency decent devices

JB29

- To store emergency suits and descent devices on offshore wind turbines
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel 3 way locking with anti-tamper facility
- 316 stainless steel hinges
- EPDM door seal
- Can be fitted with a variety of mounting options to suit different nacelle designs

Other products available within the range.

Smoke hood cabinets

JB62.150

- To store 2 x smoke hoods
- Lloyds/ABS approved composite construction with UV inhibitors
- IP56
- 316 stainless steel hinges and lid catch
- EPDM door seal
- Can be tailored to suit with other colours and lettering options

Other products available within the range.
