Habbeké

Habbeké Shipyard, established in 1966, has forty-five years experience of quality shipbuilding. The wharf builds exclusively in aluminum, and enjoys an excellent reputation for innovation, quality and service. These characteristics were recognized and honored when Habbeke was awarded the Dutch Aluminum Prize in 1994.

One of the key factors in the yard's success is its commitment to working with the client and the designer. This has resulted in many long-term relationships with individual and institutional customers. The longest association with the wharf is with K.N.R.M. (SAR).

The Fast Rescue Craft series

A Fast Rescue Craft (FRC), is a relatively small vessel designed for sea and coastal rescue duties. This type of vessel is also known and used for Man Over Board (MOB) purposes. Our experience of designing and building for and with the K.N.R.M. (our national SAR organization) makes us a very experienced yard for building aluminium craft's with waterjet propulsion. The fact that beach-launched boats from over 20 years of age still are on active duty say enough about the quality we deliver.

With the Fast Rescue Craft series we build the future of SAR operation's for our clients.

More about the Fast Rescue Craft : www.fastrescuecraft.nl

Range

Size	: 7,00 m	- 12,00 m
Speed	: 30 knots	- 50 knots
Sea State	: up to 5	

The Fast Patrol Craft series

A Fast Patrol Craft (FPC), is a relatively small naval vessel generally designed for coastal defense duties. They may be operated by a nation's navy, coast guard, or police force, and may be intended for marine (blue water) and/or estuarine or river ("brown water") environments.

They are commonly found engaged in various border protection roles, including anti-smuggling, anti-piracy, fisheries patrols, and immigration law enforcement. They are also often called upon to participate in rescue operations.

Range

Size	: 10,00 m	- 25,00 m
Speed	: 25 knots	- 45 knots
Sea State	: up to 5	

The Fast Supply Craft series

A Fast Supply Craft (FSC), is a rough work boat that is build to carry out the harsh and dirty jobs in and around the sea ports or on sea based stations. The FSC is know for it's durability, it's working proof are the boats build for the port of Rotterdam. The boats are used there by the K.R.V.E. who work and demand round the clock preference.

Our latest innovation is a craft that operates on oil rigs and windmill parks on the sea. The knowledge of the past is the solution for future crafts!

NOMAD

The Fast Pilot Craft series

A Fast Pilot Craft (FPC), is a craft that carries out pilot and harbour tasks in big sea ports. The craft is built and designed to perform in rough conditions to make the work of crew and pilot as safe as possible.

The combination of craft's in the portfolio makes us unique in the world for building and designing in one team with this wide amount of experience. Our yard is widely known for its experience for building aluminium craft's.
