

Watson & Hillhouse

Unrivalled Service in Piling Equipment Supply Since 1972

Our mission is “to provide first class piling equipment that meets or exceeds our customers’ quality, performance and service needs anywhere in the world, for the purpose of building long lasting relationships with all of our stakeholders”.

State-of-the-art hire fleet

We operate the UK’s widest range of piling equipment, supplying customers across the UK, Ireland and Europe. Our fleet at a glance:

Dieseko PVE and ICE
piling vibrators

Kowan Still Worker
noise & vibration
free pile pressing
machines

BSP hydraulic drop
hammers

Woltman piling and
drilling rigs

Bell submersible
dredge pumps

Hughes-W&H high
pressure water jetters

Nationwide service support

Operating from two strategically placed depots, our Head Office and southern depot in Ipswich and northern depot in Warrington, we ensure total support of our piling equipment on sites throughout the UK, Ireland and Europe. Our service engineers’ have fully equipped service vehicles, fitted with the latest GPS tracking systems and mobile telephone link up, ensuring immediate response to every breakdown wherever you are. Should site conditions, circumstances or requirements change, our large stocks of piling equipment are kept ready for immediate dispatch.

Committed to our customers

All equipment, whether for hire or sale, is subject to rigorous inspection in our specially equipped workshops by our qualified staff and tested on the UK’s first and only ‘absolute refusal’ piling equipment test bed before delivery. We operate a full apprenticeship scheme to ensure all our engineers have the specialist skills required to guarantee excellent customer service and all our staff undergo

regular product update training. This expertise is also available through contract maintenance and overhauls of contractors’ own equipment. Our design department can offer bespoke solutions to suit all your piling requirements

Global sales, service and support

We have UK and Global agency agreements with leading international manufacturers; in addition, our policy of continual replacement and updating of our hire fleet, and the trading in of customers equipment against new plant sales, gives us an extensive range of used piling equipment for sale.

Whether your purchase is **new or used** equipment, our highly trained, expert engineers are here to support you. In addition our overseas sub-agents are on hand to provide local support.

Piling Equipment Hire

As well as conventional piling equipment such as, Dieseko PVE/ICE Standard and High Frequency Vibrators, ICE Excavator Mounted Vibrators, and BSP Hydraulic Drop Hammers, we also have available for hire environmentally friendly equipment, for example, the Kowan Still Worker Noise & Vibration Free Pile Pressing Machines and Dieseko PVE/ICE Variable Moment High Frequency Vibrators. In addition we can also provide supplementary piling equipment such as Hughes-W&H High Pressure Water Jetters, the Kowan Water Jet Reel System and the Steel Lance System. We now also have a Woltman 40PR with a PVE4-5NL (4/5ton) accelerated hammer in our hire fleet.

Agency Piling Equipment Sales

We have UK and global agency agreements with leading international manufacturers for the sale, servicing and support of their product ranges. As we own, hire and operate all the equipment in our sales agency range, it means we have a full understanding of both the operational side of this equipment as well as an extensive technical knowledge, which enables us to react and respond to problems far quicker than might otherwise be possible.

Kowan

Kowan Still Worker noise and vibration free pile pressing machines

Hughes

Hughes-W&H high pressure water jetting units

Woltman

Piling and drilling rigs

Dieseko PVE

Crane suspended and excavator mounted vibratory hammers

Dieseko ICE

Bell

Dredging equipment

Used Piling Equipment Sales

Our policy of regularly updating our hire fleet and trading in equipment against new agency sales means that we always have surplus plant available for sale at very competitive prices. Our used equipment is generally offered and supplied fully overhauled, painted and tested; a full independent chartered engineer's certificate can also be provided if requested. Alternatively, and if required, our equipment can be purchased in 'as is' fully working condition. Our current list of equipment can be found on our website.
